- Senior Secondary School
Montfort School
2016-2018
Percentage:77

OBJECTIVE

Looking for a role to work in a challenging environment and industry. Desire to enhance my knowledge in the field of computer science.

MINI PROJECT

Project Name : Fuel price prediction using Machine learning

This project tries to create a model that anticipate fuel prices depending on mileage. This concept has the potential to assist both sellers and consumers in the used market. After completion, it may generate a reasonably accurate price prediction based on the data provided by users.

CO CURRICULAR ACTIVITIES

- Completed java fundamentals course in oracle academy.
- Completed Azure AI Fundamentals course conducted by Microsoft.
- Completed Java fullstack course from WIPRO TalentNext.
- Completed AI and Cloud computing course in Nascoom future skills.
